

SCAN 50 Manual colony counter

# A galaxy of colonies with a clear view

SCAN 50 interscience

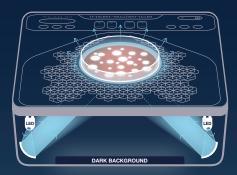

**Scan® 50** is a new generation colony counter, offering contrasted colony lighting while protecting the user's eyes. It improves the ergonomics of colony counting and prevents MusculoSkeletal disorders (MSD). Traceability is ensured by USB port.

# **Contrasting colony lighting: Dark Field 2**

Dark Field 2 is an indirect lighting system with adjustable intensity. Light reflectors diffuse the light at all points without any reflections or shadows. It makes all colonies stand out on the surface, in the mass and around the edge of the dish.

Flashes of light are eliminated and the **operator's eyes are protected.** 

## **Easy disinfection**

To keep the workstation clean, the glass and the smooth handrest are removable.

Easy to disinfect, they ensure **perfect** hygiene of the workstation.
